NOTICE OF PROPOSED INSTALLATION
ROAD CROSSING

June 24, 1980

TO: THE UPSHUR COUNTY COMMISSIONERS' COURT
GILMER, UPSHUR COUNTY, TEXAS

Formal notice is hereby given that Exxon Corporation proposes to construct two (2) pipeline road crossings beneath county roads within the right of way of Upshur County roads at the locations shown on the attached map, identified as "Attachment 1," in Precinct No. 1 in Upshur County, Texas.

The pipelines will be constructed and maintained on the Upshur County rights of way as directed by the Commissioner of Precinct No. 1 and in accordance with specification of Upshur County Commissioners' Court. Details of the proposed construction and installation are shown on the attached drawings, No. MA-4742 and No. MA-4752.

Construction under this proposal will begin on or after the 1st day of August, 1980.

The permission of this Honorable Court for such proposed construction is respectfully requested.

APPROVAL OF PERMIT APPLICATION
FOR USE OF UPSHUR COUNTY RIGHT OF WAY

Dated: July 7, 1980

TO: EXXON CORPORATION
P. O. Box 2025
Tyler, Texas 75710

Attention: Mr. Thomas A. Loftis
Right of Way and Claim Section

The Upshur County Commissioners' Court offers no objections to the location on the rights of way of your proposed gas pipelines as shown by accompanying drawings and Notice dated June 24, 1980, except as noted below:

It is expressly understood that the Upshur County Commissioners' Court does not purport, hereby, to grant any right, claim, title or easement in or upon this county road; it is further understood that in the future should for any reason Upshur County need to work, improve, relocate, widen, increase, add to, or in any manner change the structure of this right of way, this appurtenance, if affected, will be moved under the direction of the Upshur County Commissioners' Court representative and shall be relocated at the complete expense of the owner within thirty (30) days upon receipt of notice from the Commissioners' Court.

All work on the county right of way shall be performed in accordance with the Commissioners' Court's instructions. The installation shall not damage any part of the highway and adequate provisions must be made to cause minimum inconvenience to traffic and adjacent owners. Special specifications for placing this line are as follows:

1. Barricades, warning signs and lights, and flagmen when necessary shall be provided by the contractor or owner. One-half of the traveled portion of the road must be open at all times.
2. All lines, where practicable, shall be located to cross roadbed at approximately right angles thereto. No lines are to be installed under or within 50 feet of either end of any bridge. No lines shall be placed in any culvert or within 10 feet of the closest point of same.
3. Parallel lines will be installed as near the right of way lines as is possible and no parallel line will be installed in the roadbed or between the drainage ditch and the roadbed without special permission of the County Commissioners' Court.
4. Overhead lines will have a minimum clearance of 18 feet above the road surface at the point of crossing.
5. Operations along roadways shall be performed in such a manner that all excavated material be kept off the surface at all times, as well as all operating equipment and materials. No equipment, or installation procedures will be used which will damage any road surface or structures. The cost of any repairs to road surface, roadbed, structures or other right of way features as a direct result of this installation will be borne by the owner of this line.
6. All lines under roads carrying pressure in excess of 50 psi shall be enclosed in satisfactory casing extending from the right of way line to right of way line. Pipe used for casing may be of any type approved

by the County Engineer or Commissioners' Court and shall be capable of supporting load of road-bed and traffic and shall be so constructed that there will be no leakage of any matter through casing for its entire length. Inside diameter of casing shall be at least 2 inches greater than the largest diameter of carrier pipe, joints, or couplings.

7. All excavations within the right of way and not under surfacing shall be backfilled by tamping in 6-inch horizontal layers. All surplus material shall be removed from the right of way and the excavation finished flush with surrounding natural ground.
8. All ground lines are to be installed a minimum of 36 inches below the flow line of the adjacent drainage or borrow ditch.
Any material placed in county right of way by permit will be of a nature or composition that said line can be located with the use of a standard locator device used in locating buried cables or pipes.
9. Lines crossing under roads and under cross-roads within the right of way shall be placed by boring. Boring shall extend from crown line to crown line. Gravity flow sewer lines under roadways shall be cast iron or equivalent pipe.
10. Where evidence is presented indicating the impracticability of boring or tunnelling, the Commissioners' Court may grant permission to cut the surfacing no wider than 4 inches. In the event a cut is permitted the following conditions will govern:
 - (a) Excavation areas are to be filled and packed with compatible material; and
 - (b) The surfacing will be replaced with equivalent quality surfacing.
11. Notice will be given to the precinct Commissioner 48 hours prior to starting construction of the line in that Commissioners' precinct.
12. Where in the opinion of the Upshur County Commissioners' Court it may be considered necessary to protect losses incurred by damages to the roads, bridges, on right of way structures, they may by action of the Court require a surety bond in the amount sufficient to cover any damages.
13. Where, in the opinion of the Commissioners' Court, an inspector is necessary, the party receiving permit will bear the cost of an inspector.

ORDER OF COMMISSIONERS' COURT
GRANTING PIPELINE CROSSING RIGHTS
TO EXXON CORPORATION

IN THE COMMISSIONERS' COURT OF UPSHUR COUNTY, TEXAS:

On this, the 7 day of July, 1980,
on Motion duly made, seconded and passed by the Commissioners'
Court of Upshur County, Texas, and entered in its Minutes, the
foregoing Petition is hereby granted, and said applicant is hereby
granted (so far as the County is able to grant) permission, right
and privilege to lay, maintain, repair and operate two (2) pipe-
lines under and across the certain roads and ditches as shown on
the map attached to said application upon the conditions, and
agreement of Petitioner, that said pipelines are to be laid,
operated, repaired, and maintained so as not to interfere with
the drainage, proper maintenance, and free and undisturbed use
of said roads, and to relocate or change at Petitioner's risk
and expense said pipelines within the existing right of way limits
as directed by the County Engineer or Commissioners' Court upon
reasonable notice, and to save the County, and each of its Com-
missioners harmless from any cause of action aforesaid. Further,
it is agreed and understood by all parties hereto that all exca-
vations beneath oil and hard-surface roads will be bored.
